PANASONIC

PRI ROBOTICS

Panasonic and PRI Robotics have been partners since 1990. PRI Robotics is the largest systems integrator of Panasonic robots in North America with hundreds of installations. Panasonic Factory Automation provides technical support to its North American customers from its headquarters located in Franklin Park, Illinois.

As a world leading manufacturer of electrical and electronic equipment for over 80 years, Panasonic manufactures all key components of a robotic welding system: robots, welding power sources, torches, and servo work positioners. This unique single-source combination results in optimum system performance.

Creatively Applying Robotic Technology to Improve Customer Performance, Profitability and Working Environment
